REAL-TIME OPERATIONAL REPORTING IN MICROSOFT EXCEL®
FROM ORACLE E-BUSINESS SUITE AND SAP

Constantly navigating between your ERP and Excel is exhausting. You want to make your own reports, but you're frustratingly dependent on IT, unfriendly tools, and the manual, time-destructive processes it takes to make reports presentable. Reports Wand, an Excel-based solution that provides operational reporting across all ERP modules, eliminates these unnecessary steps. This reporting solution reduces errors, improves productivity, and creates an environment to easily provide the right information to the right people in the right format.

Accelerate your month-end close processes

Combine data across multiple modules in the same report

Customize ad hoc reports without reliance on IT

Faster reconciliation of data

Build reports in their final format

Refresh a real-time Excel dashboard

No more export to Excel and reformat

Reports Wand is an add-in to Microsoft Excel that allows for real-time operational reporting and analysis across all modules of your business.

With an easy-to-use Excel interface, you can build highly customized reports to meet even the most complex requirements, without relying on IT. Drag and drop report design allows for easy report building, and powerful drill-down configurations let you drill into details or related records.

ORACLE® E-BUSINESS SUITE

Access data covering the most common information requests from Finance, HR, Projects, and other modules.

Refresh reports with live data and drill to details.

Effective alternative to Oracle Standard or Custom Reports, OBIEE, Discoverer, Web ADI, BI Publisher, and Hyperion for operational reporting.

- > Facilitates ad hoc operational and subledger reporting
- > Complements your Business Intelligence strategy
- > Reconciles transactions to the General Ledger
- > Refreshes dynamic dashboards and visualizations in real time
- > Supports easy key performance indicator (KPI) creation and tracking

SAP

Report from any SAP module including MM, SD, AP, AR, and AA.

Run CDS Views directly in Excel.

Complement BOBJ, BW, and other reporting solutions.

About insightsoftware

insightsoftware turns financial and operational data into better business outcomes that drive growth and ROI. Through turnkey reporting and performance management solutions, insightsoftware provides real time access to data-driven insights in an efficient, cost-effective, and secure manner via integration with 130+ ERP systems and Microsoft Excel.
